WatchGuard System Manager v11.9.5 or higher is needed to manage a device running a Fireware XTM v11.9.5 CSP build. Fireware XTM OS v11.9.5 CSP releases are cumulative. A description of available software files is included below the *Resolved Issues* section.

Resolved Issues in Fireware CSP 1 (Build 473275)

- This release resolves an issue that caused the *fwatch* process to consume 100% of the CPU. [BUG84950]
- This release resolves a kernel crash. [BUG84635]
- This release resolves a CPU lockup and reboot that occurred when using IPS or Application Control. [BUG83883]
- The *lighttpd* process no longer uses excessive CPU when an authentication redirect occurs. [BUG84927]
- SSL Management tunnels now display correctly in FSM and WSM when connected to FireCluster. [RFE79696]
- This release resolves an issue that caused TCP connections to be unexpectedly closed by the Firebox or XTM device. Previously, long-lived TCP connections, such as Remote Desktop, would close when the connection reached the configured idle timeout, or authenticated user session timeout. These timeouts would occur even if the TCP connection was active. [BUG84739]

Available Files in this CSP Release

Software File	For Device Model	Information
XTM_OS_XTM800_1500_2500_11_9_5.exe	XTM 800, 1500, or 2500 devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM2050_11_9_5.exe	XTM 2050 devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM1050_11_9_5.exe	XTM 1050 devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM8_11_9_5.exe	XTM 8 Series devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM5_11_9_5.exe	XTM 5 Series devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_M400_M500_11_9_5.exe	M400 , M500	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_M440_11_9_5.exe	M440 devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM330_11_9_5.exe	XTM 330 devices	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM33_11_9_5.exe	XTM 33 devices	Appliance software to install sysa-dl file on your computer

		to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_XTM2A6_11_9_5.exe	XTM 25 & 26 devices (including wireless)	Appliance software to install sysa-dl file on your computer to upload to your XTM device using Policy Manager or the XTM Web UI
XTM_OS_T10_11_9_5.exe	Firebox T10 devices	Appliance software to install sysa-dl file on your computer to upload to your Firebox using Policy Manager or the XTM Web UI
xtmv_11_9_5.ova	XTMv with VMware	File to do initial installation of XTMv for VMware
xtmv_11_9_5_vhd.zip	XTMv with Hyper-V	File to do initial installation of XTMv for Hyper-V
XTM_OS_XTMV_11_9_5.exe	XTMv, all editions	File to upgrade an existing XTMv installation. Applies to VMware and Hyper-V installations.
